Private-Label Water Purifier: Step-by-Step

Buyer action checklist — print & use

Checklist

1. Choose the platform model and freeze the configuration in writing.
2. Deliver print-ready artwork (AI/PDF vector, Pantone colors specified).
3. Approve first-article samples: function test + packaging drop test.
4. Verify certification coverage for your brand name and model number.
5. Confirm packaging MOQs (carton printing has its own minimums).
6. Run the first mass order under full QC — no shortcuts for 'just branding'.
