Certifications for Selling RO Systems in Europe

Buyer action checklist — print & use

Checklist

1. Identify which CE directives apply to YOUR configuration (pump? UV? smart display?).
2. Collect the Declaration of Conformity and the test reports behind it.
3. Get RoHS test reports or supplier declarations for the bill of materials.
4. Request food-contact compliance docs for all wetted materials.
5. For the UK, decide whether WRAS approval is worth the timeline for your channel.
6. File everything per model — auditors and buyers both ask per model, not per factory.
